

CSM3023 WEB BASED APPLICATION DEVELOPMENT (K1)

BACHELOR OF COMPUTER SCIENCE (MOBILE COMPUTING) WITH HONORS

SEMESTER 2 2023/2024

LAB 6 – JSP: Saving and Retrieving Data from Database

Prepared by:

MUHAMMAD HAZIQ AIMAN BIN MUSTAFA (S67978)

Task 1:

Coding:

Output:

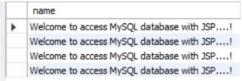

Lab 6 - Task 1 - Sample Insertion records into MySQL through JSP's page

Step 1: MySQL driver loaded...! Step 2: Database is connected..! Step 3: Prepared Statements created...!

Step 4: Perform insertion of record..!

Step5: Close data connection...! Database connection is closed...!

The record : (Welcome to access MySQL database with JSP....!) is successfully created...!

Task 2:

Coding:

insertAuthor.jsp

Author.java

```
public class Author {
    private String author)
    public void setAuthor(String subnor) {
        this.author = author)
    }

    public String getMAME() {
        this.author = author)
    }

    public String getMAME() {
        this.author = author)
    }

    public void setState(String state) {
        this.author = author)
    }

    public void setMame(String MAME) {
        this.author = author)
    }

    public void setMame(String MAME) {
        this.author = author)
    }

    public void setMame(String MAME) {
        this.author = author)
    }

    public void setMame(String MAME) {
        this.author = author)
    }

    public void setMame(String state) {
        return author)
    }

    public void setMame(String author) {
        this.author = author)
    }

    public void setMame(String author) {
        return author)
    }

    public void setCaute() {
        return zip;
    }

    public void setZip(String zip) {
        this.author = author)
    public void setZip(String zip) {
        this.author = author)
    }

    public void setZip(String zip) {
        this.author = author)
    public void setZip(String zip) {
        this.author = author)
        public void setZip(String zip) {
        this.author = author)
    }

    public void setZip(String zip) {
        this.author = author)
    public void setZip(String zip) {
        this.author = author)
    }

    public void setZip(String author)
    public void setZ
```

processAuthor.jsp

```
dlapos content/paper/service/her/
dlapos import="jara.spi."1)
dlapos import="jara.spi.
```

Output:

Lab 6 - Task 2 - Perform creating and retrieving records via JSP page

Lab 6 - Task 1 - Perform and retrieving records via JSP page

Record successfully added into Author table...!

Record with author no UK993902 successfully created..!

Details of record are;

Name: Muhaimin

Address: No 10, Jalan Jati

City: Kuala Nerus

State: Terengganu

Zip: 21300

	authno	NAME	address	city	state	zip
•	UK239904	Raden Irdian	113 Lorong Lalap	Kuala Lumpur	Kuala Lumpur	48000
	UK993902	Muhaimin	No 10, Jalan Jati	Kuala Nerus	Terengganu	21300
*	NULL	NULL	NULL	NULL	NULL	NULL

Reflection

1. What have you learnt from this exercise?

I have learn how to using JSP to insert records and retrieve them from MySQL database.

- 2. Define step by step before you successfully perform the transaction in a database.
- 1.Load JDBC driver.
- 2. Establish the connection.
- 3.Create a PreparedStatement object.
- 4.Execute the query.
- 5. Close database connection.

Task 3:

Coding:

insert Student. jsp

Student.java

```
| No. | Control | Particular |
```

processStudent.jsp

errorStudent.jsp

Output:

©2024-Ziqmunk

	studno	stuname	stuprogram

	UK209306	Arthur Softlan	BSc. in Networking
	UK56789	Ahmad Azman	BSc. Soft. Eng.
	UK6789	Liew Cheng Huat	BSc. in Robotics
_	NULL	NULL	HULL

Record successfully added into Student table...!

Record with student no UK209306 successfully created..!

Details of record are;

Student ID: UK209306

Name : Arthur Softlan

Program : BSc. in Networking

Reflection

1. What have you learnt from this exercise?

I have learnt how to use JSP Standard Action, scriplets and regular expression to insert records and retrieve them from MySQL database.

- 2. Define step by step before you successfully perform the transaction in a database.
- 1.Load JDBC driver.
- 2. Establish the connection.
- 3.Create a PreparedStatement object.
- 4.Execute the query.
- 5. Close database connection.

Task 4:

Coding:

```
cl@page contentType="cext/html" pageEncoding="UTF-8")
cl@page import="paw.sql.""s)
cl@page import="paw.sql.""s)
clbcl'
chead)

cmts http=-quiv="Content-Type" content="cext/html; charset=UTF-8")
citleDecroe Academy Student 2024/2025/fitle>
cstyle)

table[
    border-collapse: collapse;
    }
    d, th[
    border: lpx solid #999;
    padding: 0.5rem;
    text-align: left;
    }
    cut.print("ctable>");
    out.print("ctable>");
    out.print("ctable>"
```

Output:

Task 4: Retrieving record via JSP page

ISBNNo	Author	Title
UK12489	Ahmad Salam	BSc. with IM
UK209306	Arthur Softlan	BSc. in Networking
UK56789	Ahmad Azman	BSc. Soft. Eng.
UK6789	Liew Cheng Huat	BSc. in Robotics

Reflection

1. What have you learnt from this exercise?

I have learned how to use Java Scriplet to query a list of records.

2. Explain the differences when using Statement() and

PreparedStatement().

The Statement interface is used for executing static SQL statements while The PreparedStatement interface is precompiled and stored in an object.

Besides, Statement() cannot accept parameters at runtime while PreparedStatement() accepts input parameters at runtime (parameterized queries).

Statement() typically used for executing SQL queries that are run only once while PreparedStatement() Ideal for executing the same SQL query multiple times with different parameter values.

Task 5:

Coding:

register Marathon. jsp

Marathon.java

Database.java

```
public class Database (
    private static Connection myconnection = null;
    private static String myURL = myURL = "jdbc:mymql://localhost:3306/cmm3023 lab6";
    private int remult = 0;

public static Connection getConnection() throws ClassNotFoundException(
    if(myConnection != null)(
        return myConnection;
    }
    else try(
        Class.forName('com.mymql.cj.jdbc.Driver");
        myConnection = DriverManager.getConnection(myURL, "root", "admin");
    }
    catch(@GLException e)(
        -printStackTrace();
    }
    public void closeConnection() throws ClassNotFoundException
    {
        try{
            myConnection:close();
        }
        catch(@GLException e)(
            e.printStackTrace();
    }
    catch(@GLException e)(
            e.printStackTrace();
}
```

Reflection

1. What have you learnt from this exercise?

I have learned how to use JavaBeans to perform SQL transaction using PreparedStatement().

2. Describe the benefits of using JavaBeans

JavaBeans allow components to be reused across different parts of a program.

JavaBeans are easy to configure and use.

They work across different platforms.
